

Vivi Evaluation Guide

Vivi now seamlessly integrates with CommBox interactive flat panels.

Vivi is the only wireless screen mirroring and digital signage solution designed specifically for education. Vivi offers a rich set of educational features which enable better student engagement.

Now you can install the Vivi receiver app directly onto your CommBox panel with no need for additional hardware.

Get Vivi up and running on your CommBox display in minutes.

1

Find the Vivi Receiver App in the CommBox Store

From the home screen on your CommBox panel, enter the CommBox Store and scroll down to find Vivi.

2

Install the Vivi Receiver App

Once you have found Vivi, select install. Allow the installation to complete.

3

Open the Vivi Receiver

Enter the Apps menu and select Vivi Receiver from your list of installed apps. Once loaded, scan the QR code to activate Vivi on your panel.

4

Begin your free trial of Vivi

On the website you are taken to you will be asked to select if you are a new or existing Vivi customer. If an existing customer, you will be able to activate using the Vivi app. If a new customer, you will need to fill in a simple form to activate.

5

Check your email

If a new customer, after you have filled in the form, you will receive an email with further instructions. Follow these instructions to begin using Vivi on your CommBox panel.

6

Enjoy your freetrial

Your free trial will last for two weeks. We will be in touch to arrange a full trial of all Vivi's features during this time.

If you need any help feel free to contact Vivi: sales@vivi.io
