

Vivi Teacher Tip:

Multi-Task with Play Video or Pause Screen

What is Multi-Task with Play Video or Pause Screen?

Multi-task with Play Video or Pause Screen enables the teacher to use their device even as students continue to actively engage with projected content. Teachers can project a performance task rubric while reviewing student learning data with an individual learner; play a content-based video while giving feedback on digitally submitted student work; or project a warm-up activity while completing attendance.

- Watch the Vivi “Pause Screen” feature tutorial [here](#).

Research Connections:

Multi-tasking with Play Video or Pause Screen supports research-based instruction because it...

- Ensures students are **actively engaging with content in a meaningful way** while you reference learning data, prepare the next part of the lesson, or manage day-to-day operational needs.

Educator Tips & Tricks:

“Teachers have so many additional tasks placed upon them beyond instruction and relationships. The Multi-task strategy allows the teacher to maintain the continuity of instruction while completing other responsibilities.”

Jon Gregori
Innovation Specialist

Double-check the pause

- Before you navigate to confidential information on your device, **double-check that Pause Screen has been activated**. You can do this by first navigating to a screen that doesn't contain sensitive information, while keeping your eye on the projected content.

Use pause to prep

- Pause Screen on a final practice problem **while simultaneously teeing up a poll** to gauge how students are feeling about what they've just learned.

Try this strategy when...

- You want to **increase your efficiency and secure privacy** while students simultaneously engage with projected content.
